HOUSE BILL NO. 396 INTRODUCED BY M. LANG

A BILL FOR AN ACT ENTITLED: "AN ACT REQUIRING APPROVAL OF THE BOARD OF COUNTY COMMISSIONERS BEFORE THE DEPARTMENTS OF LIVESTOCK OR FISH, WILDLIFE, AND PARKS MAY AUTHORIZE ANY RELEASE, TRANSPLANTATION, OR RELOCATION OF WILD BUFFALO OR BISON CERTIFIED AS BRUCELLOSIS-FREE INTO A MONTANA COUNTY; AMENDING SECTIONS 81-2-120 AND 87-1-216, MCA; AND PROVIDING AN IMMEDIATE EFFECTIVE DATE."

Mr. Chairman and members of the Committee,

The Montana Stockgrowers Association and Montana CattleWomen support HB 396. Our members do not support the relocation of bison in Montana but are committed to being engaged in discussions about relocation, wishing to ensure that provisions of MCA 87-1-216, especially in regards to disease control and containment measures, are followed.

HB 396 is NOT a bill to grant ultimate veto power to county commissioners over wildlife. This is a bill to allow local people, through their locally elected representatives, to have a real say in whether or not bison are relocated into their county to form a wild, freeranging herd.

This bill DOES NOT affect the current management of bison in or naturally migrating out of Yellowstone National Park under the auspices of the Interagency Bison Management Plan, which includes the Montana Departments of Livestock and Fish, Wildlife and Parks. This bill DOES NOT affect sovereign tribes' ability to obtain or raise bison in whatever manner they see fit.

Some may argue that wildlife management is not the job of county commissioners. County commissioners are elected to make decisions in the best interest of their local communities and local economies. County commissioners have many concerns about land use in their counties and ensuring that the resources of the county are not unduly burdened. They have concerns about damage to public and private property and public safety. Our members feel that being involved in discussions about the relocation of bison to a county absolutely is the job of a county commissioner.

Some may argue that HB 396 would set a precedent for management of other wildlife species. Our members disagree. This bill is specifically applicable to bison, which have

never existed in a wild and free-ranging herd outside of Yellowstone National Park since before Montana even became a state in 1889.

Some may point to the Montana Supreme Court's 1940 decision in *State v. Rathbone* which held that "a property owner in this state must recognize the fact that there may be *some* injury to property or *inconvenience* from wild game from which there is no recourse" (italics added) (State v. Rathbone, 110 Mont. 225, 100 P.2d 86, 92-93 (1940)). Our members do not believe that this decision applies to wild, free-ranging bison. Our entire state—our infrastructure, our towns, our ranches and farms, our roads, our railroads—were built with bison absent from the landscape. Bison are not like other wildlife. They are not small animals that will hide or run away, especially if they are sourced from the bison quarantined coming out of Yellowstone National Park, or coming from just about any other park, where they have grown accustomed to humans.

Again, the main premise of this bill is to allow local people, through their locally elected representatives, to have a real say in whether or not bison are relocated into their county. Last year, when Fish, Wildlife and Parks began its scoping process to gauge the public's interest in establishing a wild, free-ranging herd of bison somewhere in Montana, they received nearly 23,000 comments from all over Montana, the U.S and even internationally. It is imperative that small rural communities that would be directly impacted by bison relocation have their voices heard loud and clear above the din of people who may never even come to Montana to see the bison, but just like the idea that they are there.

The bottom line is that if local people, through their county commissioners, support bison relocation, and FWP is able to follow the provisions set in the law for relocation, then relocation can occur. But on the flip side of that, if local people have significant concerns about bison relocation, they shouldn't have to bear that burden unwillingly. This bill ensures that local people have a say in whether or not, or how, bison are relocated into their area. We urge a do pass on HB 396. Thank you.

Background/Context:

In 2010, the Department of Fish, Wildlife and Parks began exploring establishing a herd of bison in Montana. The biggest impetus for this was to figure out something to do with bison from Yellowstone National Park that have graduated from the Quarantine Feasibility Study and have been declared free from the disease brucellosis. (The Department states this on their webpage "Future for Bison in Montana." http://fwp.mt.gov/fishAndWildlife/management/bison/) There were many graduates of this study and no one—zoos, tribes and others—seemed to want them or be able to take them. The Spotted Dog, Marias River, and Beartooth Wildlife Management Areas were discussed as options for placing the bison but no action was taken. So, in 2010, 86 bison from the study were transferred to Ted Turner's ranch near Bozeman. In March 2012, 63 bison from the quarantine study were transplanted to the Fort Peck Indian Reservation. Many individuals and groups argued that FWP was putting the cart before the horse by relocating these bison without having a statewide bison management plan.

In May 2012, FWP released a notice for public scoping on a statewide bison management plan environmental impact statement. They held eight public meetings that month across the state and accepted written comments through June 25, 2012 to evaluate opportunities for establishing a "huntable population of free-ranging bison somewhere in Montana." This process yielded 22,928 comments from all across, Montana, the U.S. and even globally. The EIS process has not moved beyond this scoping effort at this point in time.

Relevant definitions:

MCA 87-1-216 defines "publicly owned wild buffalo or bison originating from Yellowstone national park as a species requiring disease control."

MCA 81-1-101. Definitions. Unless the context requires otherwise, in Title 81, the following definitions apply:

- (1) (a) "Bison" means domestic bison or feral bison.
- (b) The term does not include:
- (i) wild buffalo or wild bison; or
- (ii) for the purposes of chapter 9, buffalo.
- (4) "Domestic bison" means a bison owned by a person.
- (5) "Feral bison" means a domestic bison or progeny of a domestic bison that has escaped or been released from captivity and is running at large and unrestrained on public or private land.
- (6) "Wild buffalo" or "wild bison" means a bison that has not been reduced to captivity and is not owned by a person.
